Thundercat Whitsundays is a 1 day tour around the islands, visiting the scenic White Haven beach. Morning tea and lunch are provided, as well as free bus transfers and snorkelling equipment.

The awards this trip has won speaks volumes to its position as a stand-out experience of the Whitsundays (2021 Tripadvisor Travelers' Choice Award for Tour Operator).

RED CAT ADVENTURES

These guys are so great we had to mention them twice. So not only do Red Cat Adventures run the Thundercat Whitsundays tour, they have a bunch of other really awesome, award-winning adventures. To name a couple of our other favourites, there is the Tongarra ECO Sailing Experience and the Falls To Paradise (this one is great for nature and foodie lovers).

WHITEHAVEN BEACH & GRADUATION GETAWAY

These activities sound cool but how do I organise all this?

All travel experiences will be organised by Flight Centre Travel Academy and our employer and industry partners.

Sustainability & Eco-Tourism Experiences

ECO BARGE

Eco Barge Clean Seas Inc. is an amazing not-for-profit environmental organisation based at Airlie Beach that has been bringing the community together to protect the aquatic environment of the Whitsunday region since 2009. This is an awesome experience to get involved with cleaning our oceans (and maybe even make a thong fish) and gaining an insight into the eco-tourism world.

TURTLE RELEASE

The journey to the ocean for a baby turtle is crucial to its survival in the deep. It can take around 1-4 days for a baby turtle to break through their egg and be ready to head to the sea. Be a part of the experience that is turtle releasing and witness one of the many wonders of this creature.

Plus, they're pretty cute.

REEF RESTORATION

For over three decades, coral restoration has been an important player in assisting damaged reefs, contributing to regeneration. Reef restoration involves mimicking natural processes in the sea by discovering the types of coral that can withstand harmful events (such as bleaching) and taking small cuttings from them in order to grow and reproduce the coral. Think of when you might take a sneaky cut of your neighbour's plant to grow something beautiful in both of your yards.

REEF RESEARCH

Restoration and research go hand-in-hand. To ensure we are protecting our reefs to the best of our availabilities, and not doing more harm than good, we need reef research.

All sustainability and eco-tourism experiences will be organised by Flight Centre Travel Academy and our employer and industry partners.

Quarterly events will be posted exclusively for the program participants, providing you with the opportunity to sign up.
